

Dräger X-plore® 1700 Dust Masks

The Dräger X-plore® 1700 is a particle filtering face piece series which makes breathing easy and comfortable. The CoolSAFE filter material combines low breathing resistance and high filter performance in one mask. The optional CoolMAX valve efficiently releases humid and warm exhaled air to the outside in order to keep you cool under the mask.

Dräger X-plore® 1700

CoolSAFE filter material

Combines low breathing resistance and high filter performance in one mask.

Flexible nose clip

Ensures a great fit, in the most critical area.

Soft inner layer

Comfortable to wear due to hypoallergenic and moisture repellent inner material.

Hygienic individual packaging

Individually packed and sealed in a plastic bag, ensuring it stays clean and hygienic.

VarioFLEX head harness

Continuous loop head harness made from stable, elastic textile. Easy to don and doff. Optional length adjuster for Dräger X-plore 1700+ versions.

CoolMAX exhalation valve (optional)

Releases humid and warm exhaled air in order to prevent heat build-up underneath the mask.

Folded form

Flat-folded and space-saving, making them easy to transport.

Benefits

Effective protection against particles

The X-plore 1700 series offers effective protection against fine dust as well as solid and liquid particles that are present in industry, mining, specialized trades, agriculture and services. The portfolio range offers masks for all three EN protection classes FFP1, FFP2 and FFP3 in accordance with EN 149:2001+A1:2009. For fast recognition the masks feature a colour code: dark blue for FFP1, light blue for FFP2 or white for FFP3.

If protection against unpleasant odours is necessary, we offer odour stopping versions utilizing an additional activated carbon layer inside.

CoolSAFE filter material

The specially developed CoolSAFE filter material combines various high-performance filter media to achieve an excellent filter performance. Coarse and fine particles are effectively stopped in the various filter layers. At the same time, the breathing resistance remains very low, allowing the user to work easily and without tiring for longer periods. In addition, the face pieces were subjected to the increased requirements of the (optional) dolomite dust test. Their resistance to clogging under high exposure to dust was successfully tested. During activities with high exposure to dust (e.g. mining), this gives the face pieces a longer service life and reduces costs for the user, while maintaining a high degree of wearing comfort.

CoolMAX exhalation valve (optional)

Easy and comfortable breathing: Thanks to a very low breathing resistance, it is particularly easy to breathe. Additionally, the specially engineered CoolMAX exhalation valve releases humid and warm exhaled air, preventing heat build-up underneath the mask, allowing you to stay cool.

VarioFLEX head harness

This continuous loop head harness is constructed from a stable, elastic textile strap which is easy to don and doff while sitting comfortably and pressure-free. The soft, tear-proof elastic easily stretches to fit various head sizes and prevents hair entanglement. The special X-plore 1700+ versions are additionally equipped with EasyStop to adjust the length of the harness.

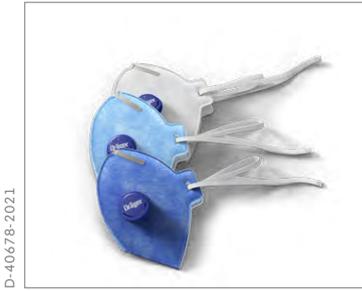

Secure and comfortable seal

Alongside the material's filter performance, a secure seal without leakage is decisive in how effective the mask's protection really is. Dräger X-plore 1700's ergonomic form and soft material fit well to the face. The integrated nose pad and nose clip can be adjusted and effectively hold the mask in place in the critical areas around the nose. Furthermore, the inside fleece is hypo-allergenic, and repels moisture thanks to its hydrophobic properties. This keeps breathing resistance low and comfort high, especially when used for longer periods of time.

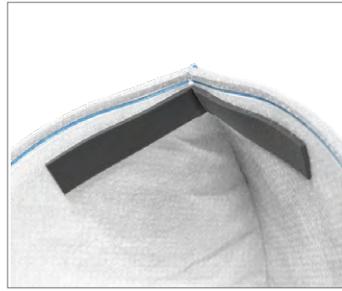

Folded form and hygienic individual packaging

All X-plore 1700s are flat-folded, saving space and making them easier to transport. Each facepiece is individually packed in a plastic bag, ensuring it stays clean and hygienic.

Details

Color coding for fast recognition of protection classes

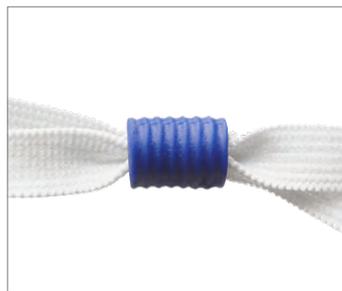

Nose pad for safe sealing around the nose

Adjustable nose clip

Breathe easier with the optional CoolMAX exhalation valve

X-plore 1700+ versions with adjustable EasyStop harness

Optional: activated carbon layer against nuisance odours

Technical Data

Dräger X-plore®1700

Filter material	CoolSAFE for protection against solid and liquid non-volatile particles
Odour versions	With additional activated carbon layer against nuisance organic odours below the limit value
Approvals	All versions meet the conditions of the EU guideline 2016/425 and are approved as particle filtering half masks in accordance to the requirements of the EN 149:2001+A1:2009. Australian Standard AS/NZS 1716:2012 certified (SAI Global)
Marking D	Successfully passed the dolomite dust test against clogging
Marking NR	The mask can only be used for a maximum of one work shift

INFORMATION ON USAGE

Protection class	Multiple ¹ of limit value ²	Fields of application and restrictions on use
FFP1	4	Against solid and liquid particles. However not against carcinogenic and radioactive materials, airborne biological substances from risk category 2 and 3, and enzymes ³
FFP2	10	Against solid and liquid particles. To be used as protection from carcinogenic and radioactive materials, airborne biological substances of risk category 3, and enzymes ³ only after a risk assessment.
FFP3	30 ⁴	Against solid and liquid particles, and also against radioactive materials, airborne biological substances from risk category 3, and enzymes ³ . Not approved in Australia.

¹ in accordance with EN 529:2005, amendments by national regulations are possible

² maximum permitted concentration of harmful substances specified by country

³ if necessary, strict observance of differing national regulations

⁴ UK: 20

APPLICATION INFORMATION

Activity	Type of particles	Filter class
Woodworking		
Sanding – hardwood, softwood	Fine particles, wood dust	FFP2
Woodcutting – hardwood, softwood	Fine particles, wood dust	FFP2
Wood staining (stain containing copper or chrome)	Fine paint mists	FFP3
Paint removal	Fine paint particles	FFP2
Paint removal, (paints containing chrome)	Fine paint particles	FFP3

Technical Data

Sanding/Grinding

Rust/corrosion removal	Rust/corrosion and metal dust	FFP2
Masonry/concrete	Stone dust	FFP2
Hard- and softwood	Wood dust	FFP2
Synthetics/Plastics	Synthetic dust	FFP2
Painting	Paint particles	FFP2
Painting, (paints containing chrome)	Paint particles	FFP3
Iron/steel	Metalurgical dust	FFP2
Stainless steel	Metalurgical dust	FFP3
Adhesive removal	Fine dust	FFP2

Construction and mining

Painting with watersoluble paints	Large paint particles	FFP2
Sprayable varnish	Paint mists	FFP2
Demolition	General dust	FFP2
Foundation setting	Concrete dust	FFP1
Concrete handling	Concrete dust	FFP1
Concrete pouring	Fine plaster dust	FFP2
Woodworking	Wood dust – soft and hard	FFP2
Insulation installation	Dust and fibres	FFP1
Roofing and tiling	Roof and tile dust	FFP2
Mining	Fine stone dust	FFP2

Metal processing

Zinc*	Zinc/general metalurgical fumes	FFP3
Aluminium*	Aluminiumoxide fumes	FFP3
Stainless steel*	Metal oxide fumes	FFP3
Manual arc welding*	Sparks, fumes	FFP3
Laser welding*	Sparks, fumes	FFP3
Hard soldering	Fumes	FFP2 Odour
Drilling	Metalurgical dust	FFP1
Sawing	Metalurgical dust	FFP1

*Welding: For concentrations of harmful gases (e.g. O₃, NO_x) below limit values.

Technical Data

Waste disposal

Waste disposal	Dust	FFP3
Cleaning tasks in low-level dust environments	Dust (non-toxic)	FFP2 Odour
Sweeping grounds	Dust (non-toxic)	FFP2 Odour
Disposal of waste and sewage	Bacteria/funghi	FFP2 Odour
Disposal of medical waste	Bacteria/virus	FFP3

This guide does not release the user from the obligation to comply with national applications and laws, for example the DGUV R 112-190 in Germany. Please read the instruction manual provided with the products.
