GRIPPS TETHERING STATION - 20T

The 20-tool (GTS-20T) GRIPPS® Tethering Station is a fully functional mobile tethering workstation suitable for various environments. Constructed from an extra heavy-duty 26oz. canvas, the minimal and isolated use of metals, combined with non-conductive tether anchors, make the GTS safe for works around live electricity.

For all works at height, attach the GTS to scaffold tubes, handrails or EWP cages using the load-rated and hard-wearing straps. Reinforced eyelets allow the GTS to be hung via hooks or tied off with rope to suit virtually any other conceivable environment.

KEY FEATURES

SPECIFICATIONS

SKU	MAX LOAD (D-RING)	SIZE
H01147	1.0KG 2.2LBS	60CM X 55CM 24" X 22"

1

To attach to a rail, wrap straps around tube and feed back through the buckle.

2

Ensure all tools are connected to an anchor point using an appropriate GRIPPS® load-rated tether.

3

Insert tools into pockets for storage.

4

Before removing a tool, connect the tether to a suitable anchor point such as a GRIPPS® Glove or Belt- Loop Anchor.

5

When you no longer need the tool, place back into the GTS pouch, reattaching the tether to an anchor point.
