BULL BAG - 113.0KG

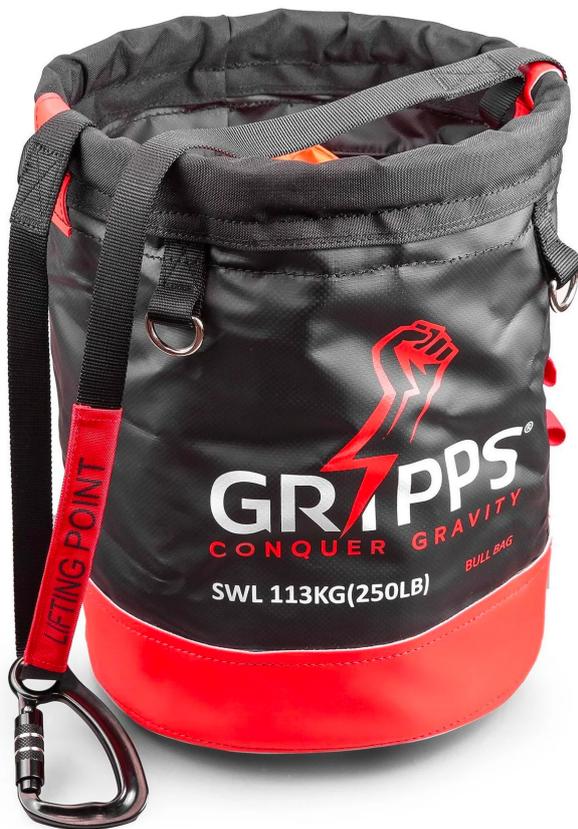

249_{LB}

113_{KG}

MAX LOAD:

Arguably the most robust lifting bag in the world, the reinforced Bull Bag features a smart locking Velcro mesh sleeve that protects against accidental spills and drops while allowing light into the bag.

Fully load rated reinforced lifting straps allows for easy transportation of Bull Bag to the work area and built-in tether anchor points mean the tools are ready to be used as soon as the bag is opened.

THE LEADERS IN FALLING OBJECT PREVENTION

GRIPPS.COM

KEY FEATURES

Heavy duty Velcro closure with locking feature protects against accidental spills

Reinforced dual-layer mesh allows light into the bag for full content visibility to secure Bull Bag during use

Built-in tether anchor points inside the bucket, enabling tools to be tethered directly to the inside of each bag

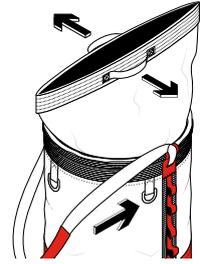

Made with extra heavy duty oil repellent vinyl and tested to last in the harshest of construction environments

A strong composite insert in the base of the bag protects against punctures

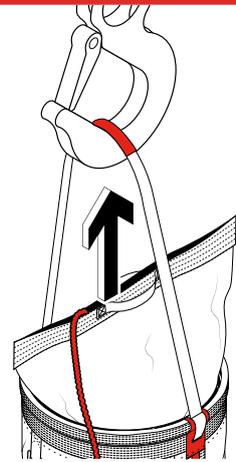

Dual-action carabiner to secure Bull Bag during use

1

To secure contents inside the Bull Bag, push the opposing sides of velcro edging together.

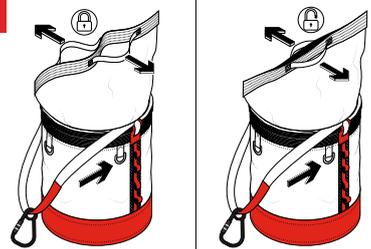

2

Only lift from the clearly identified load-rated lifting point on the straps, and ensure tools are tethered to the D-Rings at all times. Do not lift from carabiner.

*** NEVER EXCEED MAX LOAD ***

3

When closing the bag, intentionally misaligning the two handles will create a strong closure and increases security.

SPECIFICATIONS

SKU	MAX LOAD (D-RING)	MAX LOAD (LIFTING)
H01110	2.5KG 5.5LBS	113KG 249LBS
HEIGHT	DIAMETER	SECURITY
