## H02047 SCAFFOLD KEY HOLSTER

*Designed for working at height, the GRIPPS® Scaffold Key Holster keeps your scaffold key secure and accessible in a lightweight, industrial-grade design.*

A Velcro flap keeps scaffold keys secure when working at height, and load rated D-Rings provide tether anchor points for securing the tethered scaffold key.

- Compatible with all standard work belts

## HOW TO USE

- 

Remove tool ring from Retractor unit then insert into back pouch of holster. Reattach tool ring, keeping the ring exposed outside the front of the holster.
- 

Connect tool to the Retractor or side D-Rings.
- 

Slide tool into holster with connection point applied to tool.
- 

Close front strap.
- 

Apply holster to your work belt, by sliding belt through the slip located on the upper end of holster.
