## HOW TO USE

## KEY FEATURES

**1**

Remove tool ring from Retractor unit then insert into back pouch of holster. Reattach tool ring, keeping the ring exposed outside holster. Note some models require the ring fed through the center of holster + others via the side.

**2**

Connect tool to the Retractor or side D-Rings.

**3**

Slide tool into holster with connection point applied to tool.

**4**

Close front strap.
